## EXCISE PAIR PLAY.

THE EVENING WORLD urges only in the interests of justice and as tending to increase respect for the law itself, such an excise provision as will allow of a moderate Sunday license. There is a public demand for such a provision, which is so strong and so reasonable that it should be promptly recognized.

As has been set forth consistently from time to time, in this column, the present anti-Sunday selling clause is unjust, because it involves false discriminations. Being unjust, it is not to be rigidly enforced. Not being enforced, it is not respected. Hence, as a weak part of the general Excise law, it brings the whole structure into popular disregard.

Common souse joins a sense of instice in urging that a change be made, as

As an explanation of a late accident to a train on the Wabash road, the statement is advanced that the engineer probably died of heart disease soon after starting out of his last regular stopping-place. This is the second recent instance of an engine running wild with a dead hand on the lever. The ordinary railway passenger knows little, indeed, and probably thinks as little of what may be going on in the cab of the big machine that draws.

Chance that McAuliffe May Meet Myer in New Orleans.

Austin Gibbons, the Paterson light-weight, who was defeated by Jack McAuliffe some time ago, is now anxious to take McAuliffe's place in the proposed match with Billy Myer, the "Streator Cyclone," Gibbons tried to get on a match with Myer while he was in New Orleans at the time of his recent battle with Bowen. The largest purse then offered for such a match, according to Capt. Williams, the representative of the Olympic Club, now in this city, was \$2,500. The Captain is of the opinion that it would be a hard matter for Gibbons to get on a match with Myer in New Orleans for any larger purse. White Gibbons is trying to get McAuliffe's place, it is just possible that Jack will step in and carry out his contract, backed by Jerry Mahoney. A very annoying symptom of catarrh is a constant desire to clear the throat of something that is constantly accumulating there and which, on being hawked up, consists of a touch, ellmy nucus. This sense of fulness or of a foreign substance in the throat is caused by the little glands situated in the membrane lining, the threat becoming congested and inflamed by catarrh, and in which condition they secrete a large quantity of tough mucus. The efforts of the patient to rid himself of the annoying presence in the throat cause a disagreeable habit of constantly hawking, so characteristic of catarrh, if left along the voice changes, becomes hoarse, and in some cases is almost lost or size becomes rough and rasping in sound. It's often the forerunner of consumption.
